

ADVENT: ROBOWAR

Venue : SCT (Basketball Court)

Date :21st April, 2024

Time: 10am to 1.30pm

The Robowar competition, held as part of the Advent technical fest, was an exciting collaborative event between the Cybots and CEST. Participants arrived with their custom-built robo cars designed for combat, engaging in intense battles where only the fittest robots survived. The competition was structured as a knockout tournament, with each round testing the durability, strategy, and engineering skills of the participants. The robots fought fiercely in timed matches, and those who managed to outlast or disable their opponents advanced to the next rounds, culminating in a thrilling finale.

The event concluded with the awarding of 1st and 2nd prizes, which included cash rewards recognizing the top-performing teams. This competition not only showcased the creativity and technical expertise of the participants but also fostered collaboration and sportsmanship among the clubs involved. As a highlight of the Advent fest, the Robowar event successfully combined innovation, teamwork, and competitive spirit, providing an engaging and entertaining platform for robotics enthusiasts to demonstrate their skills.
