MPD 415	PROJECT PHASE 1	PWS	0	0	6	2

**Preamble:** This course is designed for enabling the students to apply the engineering knowledge in practical problem solving. The course is also intended to foster innovation in design of products, processes or systems and students are expected to develop creative thinking in finding viable solutions to engineering problems

Prerequisites: ITD334, MINI PROJECT

**Course Outcomes:** After the completion of the course the student will be able to

CO	Course Outcome (CO)	Bloom's
No.		<b>Category Level</b>
CO 1	Identify a topic of interest and use acquired knowledge within the selected area of technology for project development.	Level 3: Apply
CO 2	Discuss and justify the technical aspects and design aspects of the project with a systematic approach.	Level 3: Apply
CO 3	Analyze the technical aspects and design aspects of the project and propose a work plan	Level 4: Analyze
CO 4	Practice team dynamics to work effectively in a team for the development of technical projects.	Level 3: Apply
CO 5	Develop skills in technical presentation and report preparation.	Level 6: Create

3/2/1: high/medium/low

#### **Assessment Pattern**

The Evaluation will be conducted as an internal evaluation based on the work done, the report and a viva- voce examination, conducted by a 3-member committee appointed by Head of the Department comprising HOD or a senior faculty member, academic coordinator for that program and project guide/supervisor. The Continuous Internal Evaluation (CIE) is conducted by evaluating the progress of the project through minimum of TWO reviews. At the time of the 1<sup>st</sup> review, students are supposed to propose a new system/design/idea, after completing a thorough literature study of the existing systems under their chosen area. In the 2<sup>nd</sup> review students are expected to highlight the implementation details of the proposed solution

#### MECHANICAL PRODUCTION ENGINEERING

A zeroth review may be conducted before the beginning of the project to give a chance for the students to present their area of interest or problem domain or conduct open brain storming sessions for innovative ideas. Zeroth review will not be a part of the evaluation process..

Total marks: 100, only CIE, minimum required to pass 50

#### **Continuous Internal Evaluation Pattern:**

Interim evaluation by the evaluation committee : 20 marks
Awarded by Guide : 30 marks
Final Seminar : 30 marks
Report evaluated by the evaluation committee : 20 Marks

### Course Plan

A Project topic must be selected either from research literature or the students themselves may propose suitable topics in consultation with their guides. The objective of Project Work I is to enable the student to take up investigative study in the broad field of Instrumentation and Control Engineering, either fully theoretical/practical or involving both theoretical and practical work to be assigned by the Department on a group of three/four students, under the guidance of a Supervisor. This is expected to provide a good initiation for the student(s) in R&D work.

### The assignment to normally include:

Survey and study of published literature on the assigned topic, Preparing an Action Plan for conducting the investigation, including team work, Working out a preliminary Approach to the Problem relating to the assigned topic, Block level design documentation, Conducting preliminary Analysis/ Modelling/ Simulation/ Experiment/ Design/Feasibility, Preparing a Written Report on the Study conducted for presentation to the Department, Final Seminar, as oral Presentation before the evaluation committee

MPD	PROJECT PHASE II	CATEGORY	L	T	P	CREDIT	
416	PROJECT PHASE II	PWS	0	0	12	4	

**Preamble:** The course 'Project Work' is mainly intended to evoke the innovation and invention skills in a student. The course will provide an opportunity to synthesize and apply the knowledge and analytical skills learned, to be developed as a prototype or simulation. The project extends to 2 semesters and will be evaluated in the 7th and 8th semester separately, based on the achieved objectives. One third of the project credits shall be completed in 7th semester and two third in 8th semester. It is recommended that the projects may be finalized in the thrust areas of the respective engineering stream or as interdisciplinary projects. Importance should be given to address societal problems and developing indigenous technologies.

## **Course Objectives**

- 1. To apply engineering knowledge in practical problem solving.
- 2. To foster innovation in design of products, processes or systems.
- 3. To develop creative thinking in finding viable solutions to engineering problems.

Course Outcomes [COs]: After successful completion of the course, the students will be able to:

	Model and solve real world problems by applying knowledge across domains
CO1	
	(Cognitive knowledge level: <b>Apply</b> ).
CO2	Develop products, processes or technologies for sustainable and socially relevant
	applications (Cognitive knowledge level: <b>Apply</b> ).
CO3	Function effectively as an individual and as a leader in diverse teams and to
CO3	comprehend and execute designated tasks (Cognitive knowledge level: Apply).
CO4	Plan and execute tasks utilizing available resources within timelines, following ethical
004	and professional norms (Cognitive knowledge level: Apply).
CO5	Identify technology/research gaps and propose innovative/creative solutions
CO3	(Cognitive knowledge level: Analyze).
CO6	Organize and communicate technical and scientific findings effectively in written and
C00	oral forms (Cognitive knowledge level: <b>Apply</b> ).

### PROJECT PHASE II

# **Phase 2 Targets**

- 1. In depth study of the topic assigned in the light of the report prepared under Phase I;
- 2. Review and finalization of the approach to the problem relating to the assigned topic.
- 3. Preparing a detailed action plan for conducting the investigation, including teamwork.
- 4. Detailed Analysis/ Modeling / Simulation/ Design/ Problem Solving/Experiment as needed.
- 5. Final development of product/ process, testing, results, conclusions and future directions.
- 6. Preparing a paper for Conference Presentation/ Publication in Journals, if possible.
- 7. Presenting projects in Project Expos conducted by the University at the cluster level and/ or state level as well as others conducted in India and abroad.
- 8. Filing Intellectual Property Rights (IPR) if applicable.
- 9. Preparing a report in the standard format for being evaluated by the Department Assessment Board.
- 10. Final project presentation and viva voce by the assessment board including the external expert.

### **Evaluation Guidelines & Rubrics**

Total: 150 marks (Minimum required to pass: 75 marks).

- 1. Project progress evaluation by guide: 30 Marks.
- 2 Two interim evaluations by the Evaluation Committee: 50 Marks (25 marks for each evaluation).
- 3. Final evaluation by the Final Evaluation committee: 40 Marks
- 4. Quality of the report evaluated by the evaluation committee: 30 Marks

(The evaluation committee comprises HoD or a senior faculty member, Project coordinator and project supervisor. The final evaluation committee comprises of Project coordinator, expert from Industry/research/academic Institute and a senior faculty from a sister department).

# **Evaluation by the Guide**

The guide/supervisor must monitor the progress being carried out by the project groups on regular basis. In case it is found that progress is unsatisfactory it should be reported to the Department Evaluation Committee for necessary action. The presence of each student in the group and their involvement in all stages of execution of the project shall be ensured by the guide. Project evaluation by the guide: 30 Marks. This mark shall be awarded to the students in his/her group by considering the following aspects:

**Project Scheduling & Distribution of Work among Team members:** Detailed and extensive Scheduling with timelines provided for each phase of project. Work breakdown structure well defined. (5)

**Literature survey:** Outstanding investigation in all aspects. (4)

Student's Diary/ Daily Log: The main purpose of writing daily diary is to cultivate the habit of documenting and to encourage the students to search for details. It develops the students' thought process and reasoning abilities. The students should record in the daily/weekly activity diary the day to day account of the observations, impressions, information gathered and suggestions given, if any. It should contain the sketches & drawings related to the observations made by the students. The daily/weekly activity diary shall be signed after every day/week by the guide. (7)

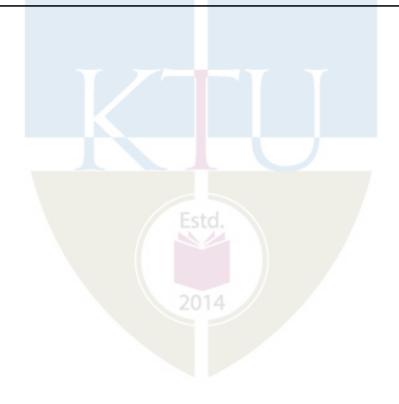

**Individual Contribution:** The contribution of each student at various stages. (9)

**Completion of the project:** The students should demonstrate the project to their respective guide. The guide shall verify the results and see that the objectives are met. (5)

			<b>EVALUATION F</b>	RUBRICS for PROJECT Phase II	: Interim Evaluation - 1		
No.	Parameters	Marks	Poor	Fair	Very Good	Outstanding	
2-a	Novelty of idea, and Implementation scope [CO5] [Group Evaluation]	5	evolved into a non-implementable	still lack of originality in the work done so far by the team. The project is a regularly done theme/topic	Good evidence of an implementable project. There is some evidence for the originality of the work done by the team. There is fresh specifications features/improvements suggested by the team. The team is doing a design from fundamental principles, and there is some independent learning and engineering ingenuity.	The project has evolved into incorporating an outstandingly novel idea. Original work which is not yet reported anywhere else.	
			(0 – 1 Marks)	(2 – 3 Marks)	(4 Marks)	(5 Marks)	
2-b	Effectiveness of task distribution among team members. [CO3] [Group Evaluation]	5	Members are still having no clue on what to do.	Task allocation done, but not effectively, some members do not have any idea of the tasks assigned. Some of the tasks were identified but not followed individually well.	being done, supported by project journal entries, identification of tasks through discussion etc. However, the task distribution seems to be skewed, and depends a few members heavily	project journal entries. All members are	
			(0 – 1 Marks)	(2 – 3 Marks)	(4 Marks)	(5 Marks)	
2-c	Adherence to project schedule. [CO4] [Group Evaluation]	5	planning or scheduling of the project. The students did not stick to the plan what they were going to build nor plan on what materials / resources to use in the project. The students do not have any idea on the budget required even after the end of	There is some improvement in the primary plan prepared during phase I. There were some ideas on the materials /resources required, but not really thought out. The students have some idea on the finances required, but they have not formalized a budget plan. Schedules were not prepared. The project journal has no useful details on the project.	Good evidence of planning done and being followed up to a good extent after phase I. Materials were listed and thought out, but the plan wasn't followed completely. Schedules were prepared, but not detailed, and needs improvement. Project journal is presented but it is neither complete nor updated regularly.	Excellent evidence of enterprising and extensive project planning and follow-up since phase I. Continued use of project management/version control tool to track the project. Material procurement if applicable is progressing well. Tasks are updated and incorporated in the schedule. A well-kept project journal showed evidence for all the above, in addition to the interaction with the project guide.	
			(0 - 1 Marks)	(2 - 3 Marks)	(4 Marks)	(5 Marks)
